Description of Project/Bid: To approve an emergency contract to allow the Miami-Dade Water and Sewer Department to pay outstanding invoices and continue the required sludge disposal. The County must legally dispose of over 100,000 tons of sludge on a yearly basis. During the three year term of contract 7122-2/13, there was numerous rain events which made land application unavailable as a viable option for disposal. Additionally, buildup at all three treatment plants required staff to clean more grit chambers and settling tanks. This unanticipated maintenance increased the volume of material which can only be accomplished using the more expensive landfill disposal options. In closing, disruption of the disposal process would therefore create an untenable position due to limited storage capacity.
